Mithresh Uttarwar

Computer Science Undergraduate

Hyderabad, India | mithreshuttarwarmmvi@gmail.com | 7396098464 | linkedin.com/in/mithresh-uttarwar | github.com/Mithreshhh

SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development using React, Next.js, Node.js, and REST APIs. Currently building production LMS infrastructure at an early-stage AI EdTech startup. Strong foundation in core computer science subjects and building scalable, user-focused web applications.

EDUCATION

B.Tech - Computer Science, Marri Laxman Reddy Institute of Technology and Management 2023 - 2027
CGPA: 8.66 | Hyderabad, India

Class XII, Gyanville Academy 2021 - 2023
Percentage: 96.5% | Hyderabad, India

Class X, Excellaina Infinitum 2021
GPA: 10 | Hyderabad, India

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java
Frontend Technologies: React, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend Technologies: Node.js, Express.js, RESTful APIs
Databases: MongoDB, MySQL, PostgreSQL
Cloud & Tools: Microsoft Azure (App Service, Blob Storage, PostgreSQL), Vercel, Docker, Git, GitHub, Postman
Computer Science Fundamentals: OOPs, DBMS, Operating Systems, Computer Networks, Data Structures and Algorithms

EXPERIENCE

Menler Learning Systems — Full Stack Developer July 2026 - Present
- Architected and built 3 core LMS modules used by ~30 users: an integrated PDF reader (pdf.js), Google Drive automation for content workflows, and Phase 2 of the assessment scoring system.
- Improved page speed score from 48 to 91 by converting image assets from PNG to WebP, reducing load times across the platform.
- Developed the Events page and contributed to an in-progress Blog module for the main Menler website (menler.in).
- Contributed to core LMS backend infrastructure and platform functionality end-to-end.
- Conducted a security audit that identified an exploitable webhook vulnerability, leading to secret rotation and removal of hardcoded fallbacks.

Sleek Sky — Web Development Intern Jan 2026 - Feb 2026
- Worked on the CMS module, contributing to core content-management functionality.
- Built 2 industry-specific website templates (dental and cardiology practices) for client deployment.
- Gathered client requirements and delivered end-to-end websites aligned with practice needs.

Institution Innovation Council (IIC) — Technical Lead 2024 - 2025
- Led development of the official IIC website and event-pass system using React, issuing ~150 event passes.
- Developed email campaign web pages and integrated a payment system into the event-pass platform.
- Actively participated in hosting and providing on-ground support during IIC events.
- Implemented responsive UI to improve accessibility and coordination.

PROJECTS

Smart Student Hub | GitHub | Live Nov 2025 - Feb 2026
- Built a full-stack student platform with role-based dashboards, approval workflows, JWT authentication, and shareable student portfolios.
- Developed using Next.js, React, Node.js, Express.js, PostgreSQL, and REST APIs; frontend hosted on Vercel.
- Deployed the backend on Azure App Service with Azure Database for PostgreSQL and Azure Blob Storage, configuring Managed Identity, RBAC, CORS, and production environment settings.

VoltWorx May 2025
- MERN stack platform connecting students with startups (React, Node.js, Express.js, MongoDB).
- Built responsive UI, APIs, and optimized deployment.

Frontend UI Projects | GitHub 2024 - Present
- Built multiple dashboards and landing pages using React, Next.js, and modern CSS.
- Focused on reusable components and performance-driven UI.
